INTERNSHIP PRESENTATION

Web Development Internship Building Responsive Web Interfaces

Using HTML, CSS & JavaScript

Cognifyz IT Solutions Pvt. Ltd. · 08 Aug - 08 Sep 2026

STUDENT NAME	Yash Khanduri
ROLL NUMBER	2410031493
PROGRAM	B.Tech
INTERN ID	CTI/A1/C403774

Web Development Intern

Cognifyz IT Solutions Pvt. Ltd.

A focused front-end web development experience

A task-based internship that moved from individual HTML/CSS fundamentals to one consolidated responsive landing page.

ORGANIZATION

Cognifyz IT Solutions Pvt. Ltd.

ROLE

Web Development Intern

DURATION

08 Aug - 08 Sep 2026

INTERN ID

CTI/A1/C403774

What defined the internship

- 01 **Build** Semantic HTML structure and page sections
- 02 **Style** CSS layouts, spacing and visual hierarchy
- 03 **Make responsive** Media queries for desktop, tablet and mobile
- 04 **Add interaction** JavaScript hamburger-menu toggle on small screens

Student

IILM University
Greater Noida

Where the internship happened

Cognifyz IT Solutions Pvt. Ltd. provided the structured environment for the internship work.

Cognifyz IT Solutions Pvt. Ltd.

An IT solutions and training organization offering structured, task-based internship programmes.

Internship model

The report describes a Level 1, Task 1 programme centered on practical front-end development.

Learning focus

The work emphasized HTML structure, CSS styling, forms, navigation, responsiveness and JavaScript interaction.

From fundamentals to a complete deliverable

HTML

Structure

CSS

Style

Media Queries

Responsive

JavaScript

Interaction

Landing Page

Integration

The problem was not writing code - it was combining it well

The internship progressively built the ability to turn isolated front-end concepts into one coherent, user-friendly interface.

PROBLEM STATEMENT

How do you combine structure, styling, responsiveness and interaction into one interface that works across screen sizes?

The report specifically frames the challenge as moving from a simple static page to forms, navigation, responsive behavior and a consolidated landing page.

INTERNSHIP OBJECTIVES

- 01 Structure pages with semantic HTML
- 02 Build and style a basic form
- 03 Design functional site navigation
- 04 Apply CSS media queries for responsive layouts
- 05 Implement mobile hamburger navigation
- 06 Integrate the skills into a complete landing page

Six tasks, one progressively stronger interface

Each task added one practical capability before the skills were consolidated into the final landing page.

01 Static webpage

Heading, paragraph and image using semantic HTML + CSS

02 Form handling

Input field and submit button, styled for usability

03 Navigation menu

Three links for consistent site navigation

04 Responsive layout

CSS media queries across screen sizes

05 Mobile navigation

JavaScript-driven hamburger menu

06 Landing page

Integrated final page for a web developer internship

Progression: structure → form → navigation → responsiveness → interaction → integration

The final deliverable: a responsive internship landing page

A single-page front-end experience combining the skills developed across the earlier tasks.

PAGE ARCHITECTURE

- | | | |
|----|----------------|--|
| 01 | Navigation Bar | Branding + links + mobile hamburger menu |
| 02 | Headline | Primary internship opportunity heading |
| 03 | Introduction | Short overview and programme duration |
| 04 | Highlights | Benefits, real-world experience and mentorship |
| 05 | Qualifications | Desired skills and technologies |
| 06 | Call-to-Action | "Apply Now" / "Learn More" |
| 07 | Footer | Contact information for enquiries |

RESPONSIVE BEHAVIOUR

DESKTOP

Full navigation

Multi-column layout

TABLET

Flexible spacing

Content reflows

MOBILE

Hamburger menu

Single-column focus

CSS media queries handle the layout changes; JavaScript supports the mobile navigation toggle.

A small stack, used with clear roles

The internship stayed intentionally focused on core front-end technologies and browser-based testing.

HTML5**STRUCTURE**

Semantic page sections and content hierarchy

CSS3**PRESENTATION**

Styling, Flexbox, spacing and visual layout

Media Queries**RESPONSIVENESS**

Adapt layout across screen widths

JavaScript**INTERACTION**

Toggle the mobile hamburger navigation

Browser + Editor**TESTING**

Code, run and inspect responsive behavior

The report limits the project scope to static front-end implementation - no backend, database or server-side integration.

What made the work useful

The internship was structured around practical front-end habits rather than isolated syntax.

01 Structure first

Semantic HTML creates a predictable foundation.

02 Style with purpose

CSS turns the structure into a clear, usable interface.

03 Design for screens

Media queries keep the page adaptable instead of fixed.

04 Add only needed interaction

JavaScript supports the mobile navigation behavior.

05 Integrate before polishing

The final landing page combines the earlier tasks into one deliverable.

The report describes this as a progressive, task-based methodology under Level 1, Task 1.

What the internship produced

A stronger working understanding of responsive front-end development, backed by a documented completion certificate.

PRACTICAL OUTCOMES

- 01 Semantic HTML + CSS styling
- 02 Usable form and navigation patterns
- 03 Responsive layouts with media queries
- 04 JavaScript hamburger navigation
- 05 One integrated, polished landing page

INTERNSHIP CREDENTIALS

STUDENT	Yash Khanduri
ROLE	Web Development Intern
ORGANIZATION	Cognifyz IT Solutions Pvt. Ltd.
INTERN ID	CTI/A1/C403774
PERIOD	08/08/2026 - 08/09/2026
CERTIFICATE ISSUED	11/09/2026

Certificate confirms successful completion of the Web Development Internship.

THANK YOU
