Of
**Web Development Internship: Building Responsive
Web Interfaces
Using HTML, CSS & JavaScript**

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of

B.Tech

By

Roll Number of Student: 2410031493

Name of Student: Yash Khanduri

Batch: 2024-2028

2026-27

CANDIDATE'S DECLARATION

I, Yash Khanduri, do hereby declare that the internship report titled “Web Development Internship: Building Responsive Web Interfaces Using HTML, CSS & JavaScript” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE.

All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree or diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Student Name: Yash Khanduri

Roll No.: 2410031493

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to everyone who supported me throughout the internship programme. I am thankful for their guidance, constructive feedback, and encouragement during the course of this work.

I would like to thank Cognifyz IT Solutions Pvt. Ltd. for providing me the opportunity to undertake a Web Development Internship and for designing a structured, task-based programme that allowed me to apply and strengthen my front-end development skills.

I am also thankful to IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement throughout the internship.

I express my gratitude to my parents for their blessings and support.

3. INTERNSHIP COMPLETION CERTIFICATE

Cognifyz IT Solutions

Internship Completion Certificate

Date -11/09/2026

This is to certify that **Yash Khanduri (Intern ID: CTI/A1/C403774)** currently pursuing B.Tech from The IILM University, Greater Noida, was working as a **Web Development Intern** with Cognifyz IT Solutions Pvt. Ltd. from 08/08/2026 to 08/09/2026.

During this period, he has served as a Web Development Intern and has displayed remarkable dedication, sincerity, and a strong desire to learn. He has exhibited exceptional coordination skills and effective communication abilities. Moreover, his attention to detail has been truly impressive.

He has consistently approached new assignments and challenges with enthusiasm, showcasing His passion for Web Development. His commitment and willingness to acquire new knowledge and skills have been evident throughout His internship.

We extend our best wishes to Yash Khanduri for a successful future, and we have no doubt that he will continue to excel in the field of Web Development.

With Regards,
Cognifyz IT Solutions Pvt. Ltd.

4. PROJECT DESCRIPTION

4.1 Introduction

This internship report presents a detailed account of the Web Development Internship undertaken at Cognifyz IT Solutions Pvt. Ltd. from 08/08/2026 to 08/09/2026. The internship was structured as a task-based, self-paced programme focused on building foundational front-end web development skills using HTML, CSS, and JavaScript.

The programme was designed to move from individual front-end concepts - structuring content, styling layouts, handling user input, and building navigation - to a single consolidated project that combines these skills into one responsive landing page. Each task built on the previous one and culminated in a complete landing-page implementation.

4.2 Organization Profile

Cognifyz IT Solutions Pvt. Ltd. is an IT solutions and training organization, ISO 9001:2015 certified and registered under the Ministry of Micro, Small & Medium Enterprises (MSME), Government of India.

The organization runs structured internship programmes across domains such as web development and data-related fields, providing learners with practical, task-based exposure to industry-relevant skills under a mentorship model.

4.3 Problem Statement

Front-end web development requires more than knowledge of individual HTML tags or CSS properties in isolation. A usable interface requires structure, styling, navigation, interactivity, and responsiveness to work together as a coherent experience across screen sizes.

The internship addressed this challenge progressively: beginning with a simple static webpage, moving through form handling and navigation, introducing responsive design with CSS media queries and a collapsible mobile navigation menu, and finally integrating these fundamentals into a complete business-style landing page.

4.4 Project Objectives

- To structure a simple webpage using semantic HTML and style it with CSS.
- To build and style a basic HTML form with an input field and a submit button.
- To design and code a functional navigation menu using HTML and CSS.
- To convert a static webpage into a responsive layout using CSS media queries.
- To build a mobile-friendly navigation menu that collapses into a hamburger menu on smaller screens.
- To integrate the preceding fundamentals into a single, complete landing page for a practical use case.
- To strengthen practical skills in HTML structuring, CSS styling, and responsive design principles.

4.5 Scope of the Project

Included: HTML page structure, CSS styling, form creation, navigation design, responsive layout using media queries, mobile-friendly navigation patterns, and the final landing-page implementation.

Final implementation: a landing page for a web developer internship programme, covering a headline, introductory overview, programme highlights, desired qualifications, a call-to-action, and a contact footer.

Outside the scope: backend development, databases, and server-side integration. The work remained a static front-end implementation using HTML, CSS, and JavaScript.

4.6 Technologies and Tools Used

Category	Technologies / Tools	Use in the Internship
Markup & Styling	HTML5, CSS3, Flexbox	Page structure, styling, layout, and component positioning.
Responsive Design	CSS Media Queries, mobile-first principles	Adapting the interface across desktop, tablet, and mobile widths.
Interactivity	JavaScript	Hamburger-menu toggle interaction for mobile navigation.
Development & Testing	Code editor, modern web browser	Implementation, browser testing, and responsive-layout inspection.

4.7 Page / Project Architecture

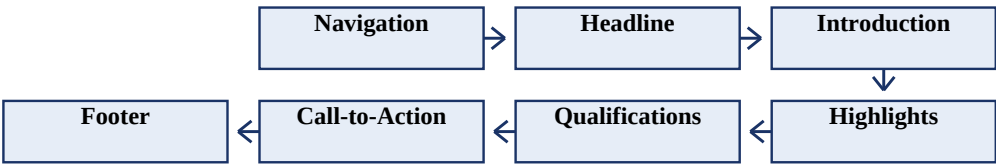

The final landing page followed a single-page structure. The sections below represent the same components documented in the internship report, organized as a simple visual hierarchy for clarity.

Navigation Bar	Headline Section	Introduction Section
Highlights Section	Qualifications Section	Call-to-Action
Footer		

Responsive behaviour

Responsive behaviour across the page was handled using CSS media queries so that the layout adapted cleanly across desktop, tablet, and mobile screen widths. On smaller screens, the navigation menu collapses into a hamburger icon controlled through JavaScript.

Page Flow

4.8 Methodology

The internship followed a progressive, task-based methodology, moving from isolated front-end fundamentals to one consolidated landing-page project.

Task	Focus Area	Work Completed
1	Static Webpage	Created a simple webpage with a heading, paragraph, and image using semantic HTML and CSS styling.
2	Form Handling	Built a basic HTML form with a single input field and a submit button, styled for a clean and usable layout.
3	Navigation Menu	Designed and coded a simple navigation menu with three links using HTML and CSS.
4	Responsive Layout	Converted the static page into a responsive design using CSS media queries so the layout adapted across screen sizes.
5	Mobile Navigation	Built a mobile-friendly hamburger navigation menu using HTML, CSS, and JavaScript for the toggle interaction.
6	Landing Page Project	Combined the preceding skills into a complete landing page with headline, introduction, programme highlights, qualifications, call-to-action, and footer.

4.9 Expected Outcomes

- Developed practical ability to structure a webpage using semantic HTML and style it effectively with CSS.
- Developed the ability to build and style a functional HTML form with an input field and submit button.
- Developed the ability to design and implement a clear, usable navigation menu.
- Gained practical understanding of responsive web design using CSS media queries.
- Implemented a mobile-friendly, JavaScript-driven hamburger navigation menu.
- Integrated multiple front-end fundamentals into one complete landing-page implementation.
- Gained hands-on, task-based exposure to front-end web development practices at Cognifyz IT Solutions.

4.10 Internship Completion Certificate

The Internship Completion Certificate issued by Cognifyz IT Solutions Pvt. Ltd. confirms Yash Khanduri's successful completion of the Web Development Internship (Intern ID: CTI/A1/C403774) for the period 08/08/2026 to 08/09/2026. The certificate is included in Chapter 3 of this report.
